

Black Maternal
Health Momnibus
Act of 2021

S.347/H.R.92

DATA TO SAVE MOMS ACT

RESEARCH!

Gather critical information about the maternal health crisis among Indigenous women, who are at similar risk to Black women, by commissioning a needed study.

Strengthen and diversify Maternal Mortality Review Committees to help us understand the causes and impacts of the maternal health crisis at the community level.

This bill expands data collection and research on maternal morbidity and mortality among minority populations. Specifically, the bill adds requirements to a program within the Centers for Disease Control and Prevention (CDC) that supports maternal mortality review committees. To the extent practicable, the committees must use the most up-to-date indicators of severe maternal morbidity; review deaths caused by suicide, overdose, or other behavioral health conditions attributed to or aggravated by pregnancy or childbirth; and consult with representatives of communities about nonclinical factors that may contribute to adverse maternal outcomes.

SPONSORS:

Sen. Tina Smith [D-MN] / Rep. Sharice Davids [D-KS-3]
